CAREER OBJECTIVE

5 years of professional experience in DevOps and AWS configuration management tools which include Project Setup, Build Automation, Continuous Integration, ContainerOrchestration, CI/CD workflow using Jenkins.

SKILLS & PROFICIENCIES

- Operating Systems: Linux, Windows
- Cloud Technologies: AWS
- Version control: GIT, GITHUB
- Continuous Integration: Jenkins
- Build Tools: Maven
- Ticketing Tool: Jira
- Monitoring: Prometheus, Grafana
- Configuration management: Ansible
- Web Servers: Apache, Nginx
- Containerization: Docker
- Container Orchestration: Kubernetes
- Infrastructure Code: Terraform
- Store Secrets: Hashicorp Vault

WORK HISTORY

- Experience as a DevOps Engineer involved in SCM, Build & Release activities.
- Working experience with Continuous integration using Git, Maven, and Jenkins.
- Experience in creating branches, tags, user, locking, branch locking, and Daily Activities included force builds.
- Extensive experience with Jenkins, for Continuous Integration and end-to-end automation tools for deploying.
- Knowledge in Container Orchestration tools like Kubernetes Cluster Services
- Extensively worked on Docker, creating Docker images and Docker containers.
- Good Experience in writing the Docker file.
- Experience with software development tools like GIT, Jenkins, Maven.
- Hands-on experience in automating build process using Jenkins CI Tool.
- Administration and creation of Individual Jenkins jobs, including automatic generation, reporting, and alerting of build failures, and build status indicators.
- Experience on Application Server Tomcat.
- Experience on Build Tool Maven, Repository Manager Nexus.
- Experience in store secrets in Hashicorp Vault
- Experience in writing Ansible playbook And Ansible tower.
- Experience in Amazon Web Service resources like EC2, AMI, VPC, S3, IAM, Auto Scaling.
- Interest and ability to learn and work with new technologies.
- Application Deployment and environment configuration using Ansible.
- Responsible for the creation and management of Ansible Playbooks.
- Experience in automating the infrastructure in AWS using Terraform.
- Good work experience in end-to-end Building, deploying and configuration process.
- Having experience using Maven as a build tool for building deployable artifacts from source code.
- Having Experience in using Terraform {Infrastructure as code} for setting up Infrastructure

Devops Engineer

Harman Connected
Services. From Feb
2025 to Present.

Roles & Responsibilities:

- Deploy and manage containerized application applications using Docker and EKS.
- Develop Infrastructure as Code using Terraform, enabling repeatable infrastructure provisioning.
- Integrate security practices into pipeline with vulnerability scanning and IAM role based access.
- Set up and configure aws services according to the design plan and automate it as required.
- Provide ongoing support and troubleshoot aws existing resources.
- Setup, Monitor and Respond alerts as per the requirement
- Write YAML configurations files for workflow, Configure triggers like push, pull based on project need.
- Optimize and Reduce Cost part with different approaches.

Senior Engineer

Servion Global Solutions
from August 2024 to
January 2025.
Client Harman Services

Roles & Responsibilities:

- The source code in GIT for various applications.
- Architect and plan AWS Solution based on the business requirements.
- Setup and configure aws services according to the design plan and automate it as required.
- Monitor aws infrastructure and application. Ensure performance, availability and cost efficiency.
- Migrate Jenkins to GitHub Actions for that plan and design workflow to automate CICD.
- Write YAML configurations files for workflow, Configure triggers like push, pull based on project need.
- Optimize workflow for performance.

DevOps Engineer

Dreamcare Developers
Pvt Ltd. From June 2022
to February 2024

Roles & Responsibilities:

- The source code in GIT for various applications.
- Creating different Infrastructure through IAC tool terraform.
- Uploading Images and dependency files on server.
- Handling Nginx configuration with Ansible, Checking Alerts, Providing queries of DB to the developers
- Scaling Infra like EC2 RDS, Handling permission of S3 object

Kubernetes Project Roles and Responsibilities:

- Working on Kubernetes cluster security, storage orchestration, load balancing and scaling, high availability, disaster recovery, rollouts and rollbacks, and storage orchestration.
- Scheduled, deployed and managed container replicas onto a node cluster using Kubernetes.
- Created Kubernetes dashboard, network policies, metrics, and monitoring reports.
- Writing various yaml files as creating Deployments, role, role binding, service accounts, pods, and exposes with front-end and back-end services.
- Implemented various k8s applications using Helm and Helm chart.
- Implemented AWS solutions using EC2, S3, RDS, EBS, elastic load balancer, auto-scaling groups.

- Automate deployment of applications, system configurations, and security settings in AWS cloud base environment while implementing integrations, updates, and fixes.

Key Note Worthy Projects:

- Horse Riding Betting Application, Learning Center Infrastructure,
- E-book for Tax Saving,
- Medical Industry,
- Basketball online coaching institute

Associate DevOps Engineer

Atos Syntel. From June 2021 to May 2022.

Roles & Responsibilities:

- Managing the source code in GIT for various applications.
- Implemented the setup for Master slave architecture to improve the performance of Jenkins.
- Setting up the Jenkins jobs for Continuous integration process and had executed test cases.
- Managing/Tracking the status of the defect with the help of Jira.
- Created automated builds and daily deployments for different environments using Maven.
- Automate Continuous Build and Deploy Scripts for Jenkins Continuous Integration tool.
- Built and managed a large deployment of Linux instances systems with Ansible Automation.
- Configured Jenkins with Maven build tool to generate the war files.
- Using Nexus to store the generated artifacts and versioning the artifacts with timestamp.
- Integrating Git with Jenkins and Nexus in continuous integration and configured Jenkins with Poll SCM build trigger.
- Migrate Jenkins to GitHub Actions

Associate

MindIT Services. From Jan 2020 to May2021.

Roles & Responsibilities:

- Collaborate with senior engineers to troubleshoot complex technical problems.
- Monitor the health, performance, and availability of cloud resources and services.
- Respond to alerts and notifications, diagnosing and resolving issues that arise.
- Assist in provisioning and configuring virtual machines, cloud resources as needed.
- Learn about cloud security best practices and help ensure the security of cloud environments.
- Assist in implementing security measures such as access controls, encryption, and identity management.
- Collaborate with your team to design and implement solutions that align with project goals.

CERTIFICATION

Certified Kubernetes Administrator CKA

EDUCATIONAL BACKGROUND

- **Master of Business Administrator:** - at DKTE's Textile & Engineer Institute Ichalkaranji.
- **Bachelor of Business Administrator:** - at Chintamanrao College Of Commerce, Sangli
- **HSC12th:** Shivaji University Kolhapur Maharashtra
- **SSC 10th:** Board: Maharashtra Board.

PERSONAL DETAILS

- Date of Birth: 12/05/1997
- Languages Known: English, Marathi, Hindi
- Nationality: INDIAN
